

TechPoint

MOBILE SOLUTIONS

BRAND & WEBSITE PLAN

Premium Website Strategy & Build Plan

Prepared to support the Canada C11 (Significant Benefit / Owner-Operator) business application

Company	TechPoint Mobile Solutions Limited
Incorporation	Ontario Business Corporations Act · OCN 1001599745 · 7 May 2026
Registered office	448 Gibraltar Drive, Unit 9, Mississauga, Ontario, L5T 2N8, Canada
Founder & CEO	Syed Ijaz Hussain Shah · 19+ years in mobile & electronics retail
Recommended domain	techpointmobile.ca · info@techpointmobile.ca
Phone	+1 (437) 559-2990
Prepared	6 July 2026

Purpose of this document. A professional, content-rich website is one of the clearest ways to show a visa officer that TechPoint Mobile Solutions is a **genuine, active, and economically beneficial** Canadian business. This plan defines the brand, sitemap, page-by-page content, design system, and technical requirements — and maps every element back to the C11 assessment criteria and the approved business plan.

1. Executive Overview

The TechPoint website has two jobs, and it must do both to a premium standard.

A. Support the immigration file

Serve as verifiable, third-party-facing evidence that the business is real, professionally run, compliant, and delivers a **significant benefit to Canada** – the core of the C11 test.

B. Win local customers

Drive walk-in traffic to the Mississauga store through strong local SEO, a Google Business Profile, click-to-call, store hours, and clear service information for nearby residents.

Primary objectives

- **Establish legitimacy** – display the legal entity, Ontario incorporation number, registered address, hours and photos of a real neighbourhood store.
- **Communicate the offer** – device sales, accessories, prepaid SIM/eSIM activation, and everyday technical support, with transparent, no-pressure positioning.
- **Evidence economic benefit** – a dedicated page on local jobs, local spending, tax contribution, and digital inclusion.
- **Show the operator** – a credible founder profile documenting 19+ years of hands-on mobile-retail ownership.
- **Convert locally** – make it effortless to call, get directions, or visit in person.

Success measures

Goal	Metric	Target (first 6–12 months)
Local discoverability	Google Business Profile views / "Get directions" clicks	Ranked in local map pack for "phone store Mississauga", steady month-over-month growth
Engagement	Click-to-call & contact-form submissions	Consistent weekly inbound contacts
Credibility	Site completeness & professionalism	All trust elements live before application submission
Performance	Google PageSpeed (mobile)	90+ mobile, < 2.5s largest contentful paint

Guiding principle. Everything on the site should be **true, specific, and verifiable**. For an immigration reviewer, concrete detail (real address, hours, incorporation number, named founder, local phone) is far more persuasive than marketing superlatives.

2. How the Website Supports the C11 Business Application

The C11 “significant benefit” / owner-operator pathway asks an officer to be satisfied that the applicant will **actively operate a genuine business** that provides **economic, social or cultural benefit** to Canada. Each requirement below is answered by a specific part of the site.

C11 / business-plan requirement	Where the website provides the evidence
Genuine, established, active business	Professional design, real Mississauga address + embedded map, store hours, store photography, Ontario incorporation number (OCN 1001599745) in the footer, Google Business Profile link. ✓
Applicant actively manages / operates (owner-operator)	<i>About / Founder</i> page presents Syed Ijaz Hussain Shah as Founder & CEO with a hands-on management narrative and owner-operator staffing model. ✓
Significant economic benefit to Canada	Dedicated <i>Community & Economic Impact</i> page: local job creation, lease/utilities/Canadian supply-chain spending, GST/HST tax contribution, and improved digital access. ✓
Job creation for Canadians	<i>Careers</i> page (“We hire locally”) plus the impact page’s commitment to a permanent local retail role in Year 1 with growth. ✓
Relevant qualifications & experience	Founder profile documenting 19+ years owning and operating mobile/electronics retail – directly mirroring the Canadian model. ✓
Business viability	Depth of services, Canadian market context, and premium presentation signal a considered, viable operation (financials remain in the business plan itself). ✓
Local Canadian presence	Mississauga-focused content, local phone (437), local SEO and schema markup, optional English/French content. ✓
Regulatory compliance	Privacy Policy, Terms, an AODA accessibility statement (Ontario requirement), and consumer-protection / warranty notes. ✓

Reviewer’s shortcut. Officers and their delegates frequently search for a business online. A polished, consistent web presence – matching the letterhead, incorporation record and business plan – removes doubt and corroborates the entire file at a glance.

Consistency across the file

The website will use the **same brand, logo, colours, address, phone, email and legal identifiers** as the incorporation certificate, business plan, and the new letterhead. This coherence is itself evidence of a real, organised enterprise.

3. Brand Identity · delivered

A complete visual identity has already been produced and is ready to deploy across the website, storefront signage, packaging and stationery.

Logo system

The mark combines a **location pin** ("Point") with a **mobile-signal node** — encoding "TechPoint Mobile" in a single, scalable symbol. Delivered variants:

- Primary horizontal lockup (colour, for light backgrounds)
- Reversed lockup (white, for navy / photographic backgrounds)
- Stacked lockup (for square / narrow placements)
- Icon, app tile, and favicon set (.ico + PNG 32–512) for browser tab & social avatars
- Monochrome navy version (for faxes, stamps, single-colour print)
- Scalable **SVG** sources for all marks

Colour palette

Ink Navy	#0C2237 — primary
Signal Blue	#2C63E6 — secondary
Bright Cyan	#2C63E6 — accent
Mist	#F5F8FB — surfaces
Slate Ink	#233242 — body text

Typography

Headings & UI: Segoe UI / a geometric sans (web: *Inter* or *Poppins*).

Body: same family for a clean, modern feel; generous line-height.

Wordmark: two-tone "Tech" (navy) + "Point" (blue) linking the word to the pin.

Tone & imagery

Clean, trustworthy, and modern — **premium but approachable**. Photography should feature real devices, accessories, a bright neighbourhood storefront, and friendly in-person service. Avoid generic stock where authentic store photos can be used (authentic imagery also strengthens the visa file).

Trustworthy

Modern

Local

Helpful

Transparent

Premium

4. Domain & Business Email

Recommended domain

Primary recommendation: **techpointmobile.ca** — short, on-brand, memorable, and clearly tied to "TechPoint Mobile." A **.ca** domain also signals a committed Canadian business.

Priority	Domain	Notes
1 (primary)	techpointmobile.ca	Best balance of brand fit, length and memorability
2	techpointsolutions.ca	Strong alternate if #1 is taken
3	gettechpoint.ca	Friendly, action-oriented
4	techpointmobilesolutions.ca	Exact legal name (longer to type)
5	mytechpoint.ca / techpoint.ca	techpoint.ca may be premium/registered — check

Also register the matching **.com** where available and point it to the **.ca** to protect the brand.

.ca eligibility. CIRA requires a Canadian Presence to hold a **.ca** domain. The Ontario corporation (OCN 1001599745) satisfies this — register the domain in the **company's legal name**. Availability should be confirmed at any CIRA-accredited registrar before purchase.

Business email

Use domain-based mailboxes (Google Workspace or Zoho Mail) — never a free @gmail address on the site.

- **info@techpointmobile.ca** — general enquiries (primary, shown on site & letterhead)
- **sales@techpointmobile.ca** — orders & product questions
- **support@techpointmobile.ca** — technical support & after-sales
- **careers@techpointmobile.ca** — hiring
- **ijaz@techpointmobile.ca** — founder / management

Configure **SPF, DKIM and DMARC** so email is trusted and lands in inboxes, and set up a professional email signature using the reversed logo.

5. Sitemap & Navigation

A focused, conversion-oriented structure. Primary navigation stays short; supporting and legal pages live in the footer.

Page	Role	Nav
Home	Hook, value proposition, service snapshot, trust signals, local CTA	Primary
About Us / Founder	Company story, mission & values, founder credentials, incorporation facts	Primary
Services	The four service pillars, in depth	Primary
Products / In-Store	Device & accessory categories; carriers/MVNOs supported	Primary
Community & Impact	Economic & social contribution to Canada	Primary
Careers	Local hiring intent & current openings	Footer + About
Contact	Address, map, hours, phone, email, contact form	Primary + button
News / Tips (optional)	Local SEO content: buying tips, eSIM how-tos	Footer
Privacy Policy	Data-handling disclosure (PIPEDA)	Footer
Terms of Use	Site & sales terms	Footer
Accessibility (AODA)	Ontario accessibility commitment	Footer
Returns & Warranty	Consumer-protection clarity	Footer

Global elements (every page)

- **Header:** logo, primary nav, prominent “Call +1 (437) 559-2990” button.
- **Footer:** logo, address, hours, phone/email, quick links, legal links, social, Google map link, and “TechPoint Mobile Solutions Limited · Ontario Corp. No. 1001599745.”
- **Sticky mobile call bar** — one-tap call on phones (this is a phone store — make calling effortless).

6. Page-by-Page Content Plan

Home

- **Hero:** headline "Your neighbourhood mobile & tech point in Mississauga." Sub-line on devices, accessories, SIM/eSIM and support. Buttons: *Call now* · *Visit the store*.
- **Service snapshot** — four cards (one per pillar) with icons.
- **Why TechPoint** — fast, personal, transparent, no long contracts.
- **Market context** — tasteful stats (85%+ of Canadians own a smartphone; 37M+ wireless subscriptions) framing local demand.
- **Trust band** — "Locally owned · Ontario incorporated · Real in-store support."
- **Map + hours + call-to-action;** footer.

About Us / Founder

- **Company story** — a neighbourhood tech hub built to make mobile life simpler.
- **Mission & Vision & Values** — drawn from the business plan (accessibility, personalised service, convenience, affordability, community focus).
- **Founder profile** — **Syed Ijaz Hussain Shah:** 19+ years owning/operating mobile & electronics retail; procurement, inventory, sales strategy, team leadership; hands-on, customer-first approach. (Directly supports the owner-operator requirement.)
- **Our commitment to Canada** — compliant operation, local jobs, digital access.
- **Company facts** — legal name, OCN 1001599745, registered address.

Services

Mobile Device Sales

Curated, value-priced and popular smartphones and basic devices; help choosing the right phone.

Mobile Accessories

Cases, chargers, cables, power banks, earphones — everyday essentials at fair prices.

Prepaid SIM & eSIM Activation

On-the-spot activation and switching across major carriers and MVNOs — no long-term contracts.

Tech Support & Bill Payment

Setup, troubleshooting, transfers, and bill-payment assistance — friendly in-person help.

Each service gets its own short section with "what it is", "who it helps", and a call-to-visit.

Products / In-Store

- Category tiles: **Smartphones · Accessories · Chargers & Power · Audio · Connectivity**.
- “Carriers & brands we help you connect with” — logos of major carriers & MVNOs (as a helpful guide; with a not-affiliated disclaimer where appropriate).
- Clear message: **browse online, buy in-store** (no e-commerce required at launch; keeps operations lean and matches the business plan). Optional “reserve & collect” form later.

Community & Economic Impact · [key for the visa](#)

- **Local jobs** — a permanent local retail position in Year 1, expanding as the store grows.
- **Local spending** — lease, utilities, Canadian suppliers/distributors, and professional services.
- **Tax contribution** — GST/HST collection and remittance; payroll and income-tax participation.
- **Digital inclusion** — in-person help for seniors, newcomers and students who struggle with online-only support.
- **Neighbourhood vitality** — complements (not competes with) national carriers by serving prepaid and walk-in customers locally.

Present this page factually and modestly — it reads as a public-benefit statement an officer can cite, and it mirrors the “Contribution to the Canadian Economy” chapter of the business plan.

Careers

- “We hire and train locally.” Roles: retail sales associate; future roles as the store scales.
- Simple application form → careers@techpointmobile.ca. Signals genuine job creation.

Contact

- Address + **embedded Google Map**, business hours, click-to-call, email, and a short contact form (name, email, phone, message) with spam protection.
- Link to the **Google Business Profile** and directions.

7. Design System & User Experience

Layout & components

- Clean, spacious layout on a 12-column grid; generous white space; navy/cyan accents on white.
- Reusable components: hero, service card, stat band, testimonial, CTA band, map/contact block, footer.
- Consistent buttons: primary (blue), secondary (outline), and a persistent “Call” action.
- Subtle motion only (fade/slide on scroll) — premium, never gimmicky.

Mobile-first & responsive

The audience shops for phones — most visits will be on a phone. Design for mobile first: large tap targets, a sticky call bar, fast-loading images, and a hamburger nav. Test across phone, tablet and desktop.

Accessibility — WCAG 2.1 AA & AODA

- Ontario businesses are expected to meet **AODA** accessibility standards — a genuine compliance point (and a visa-friendly signal).
- Sufficient colour contrast, keyboard navigation, alt text, semantic headings, focus states, and an **Accessibility Statement** page.

Performance

- Optimised/compressed images (WebP), lazy-loading, minimal scripts, a CDN.
- Targets: 90+ mobile PageSpeed, LCP < 2.5s, near-zero layout shift.

Bilingual (optional but recommended)

A French toggle (EN/FR) is not legally required for a private Ontario retailer but is a strong, Canada-aligned enhancement and widens the local audience. Can be phased in after launch.

8. Technical, SEO & Compliance Requirements

Local SEO (drives walk-ins)

- **Google Business Profile** — claim & verify; NAP (name, address, phone) identical to the site and letterhead; photos, hours, categories, posts.
- **LocalBusiness schema.org** structured data (JSON-LD) with address, geo, hours, phone — helps Google understand and display the business.
- Local keywords (“phone store Mississauga”, “eSIM activation near me”, “prepaid SIM Mississauga”), unique page titles/meta descriptions, XML sitemap, and Bing/Google Search Console.
- Consistent citations/listings (Google, Bing, Apple Maps, Yelp, YellowPages.ca).

Core technical

- **HTTPS/SSL** (mandatory), fast hosting/CDN, daily backups, uptime monitoring.
- **Analytics** — Google Analytics 4 + call/lead tracking to measure results.
- **Forms** — spam-protected contact & careers forms routed to the business inboxes.
- **Open Graph / social preview** image, favicon set (already delivered).
- Domain email deliverability (SPF/DKIM/DMARC).

Legal & compliance pages

Page	Why it matters
Privacy Policy	PIPEDA — the store handles customer data during SIM/eSIM activation & support
Terms of Use / Sale	Clarifies site use and sales expectations
Accessibility (AODA)	Ontario accessibility commitment
Returns & Warranty	Consumer-protection transparency; builds trust

Why this matters for C11. SSL, privacy compliance, accessibility and a verified Google presence are exactly the signals that separate a **real, compliant operating business** from a placeholder page — reinforcing the “genuine business” finding.

9. Recommended Stack, Roadmap & Checklist

Recommended build approach

Option	Best for	Notes
Custom static site (Astro / Next.js on Vercel or Netlify)	Recommended. Premium look, top speed & SEO, low hosting cost	Built from this brand kit; developer-maintained
WordPress + premium theme	Owner wants to self-edit content easily	More plugins/maintenance; still fully brandable
Webflow	Fast visual build with easy edits	Higher monthly cost; good design control

All three can deliver the same premium result. The static-site route gives the best performance/SEO for the lowest ongoing cost, which suits a lean neighbourhood store.

Indicative budget (annual, CAD)

Item	Estimate
.ca domain	~\$20–25 / yr
Business email (Google Workspace / Zoho)	~\$0–10 / user / mo
Hosting / CDN (static) or managed WordPress	~\$0–30 / mo
Design & build (one-time)	Scope-dependent — brand kit already done reduces this

Build roadmap

Phase	Work	Output
1 · Foundation	Register domain & email; finalise sitemap & copy	Domain live, inboxes, content ready
2 · Design	Apply brand kit to page designs (home + templates)	Approved mockups
3 · Build	Develop responsive pages, forms, schema, SEO	Staging site
4 · Content & media	Store photos, hours, product lists, founder bio	Populated site
5 · Launch	QA, accessibility & speed checks, Google Business Profile, analytics	Live site + listings

10. Delivered in This Package

The brand foundation for the website (and the wider application file) is already built and handed over in this folder.

Logo & brand

- Primary, reversed and stacked **logo lockups** (PNG)
- Icon, app-tile and **favicon set** (.ico + PNG 32–512), monochrome version
- Scalable **SVG** sources for all marks
- Defined colour palette & typography (in this document)

Premium letterhead / letterpad

- **TechPoint-Letterhead.docx** — editable, ready to type on
- **TechPoint-Letterhead.pdf** — print/reference, identical branding
- **...-SAMPLE.docx / .pdf** — a filled example letter
- **TechPoint-Letterhead-flat.png** — flat image version

The DOCX and PDF share the exact same letterhead frame graphic, so both formats are visually identical — the DOCX simply adds an editable text layer over the same design.

This plan

- **TechPoint-Website-Plan.pdf** — the document you are reading

Content & assets to gather

Ready now ✓

Logo system · colours & type · letterhead · company facts (OCN, address) · founder bio basis · services & impact copy (from the business plan) · phone & email.

To collect

Store photos & storefront sign · exact opening hours · a founder headshot · final product/accessory list · carrier/MVNO list · any customer reviews.

Recommended next steps

1. Confirm and register **techpointmobile.ca** (in the company name) + set up **info@** email.
2. Approve the brand and this plan.
3. Gather the “to collect” assets (store photos, hours, product list, headshot).
4. Proceed to design & build (Phase 2 onward). We can begin the homepage next.
